

# Procurement Module

End-to-End User Process Guide

## Step 01 | Purchase Requisition

End User / Requester

- Identify a need for goods or services
- Fill out a purchase requisition (PR) form in the system
- Specify item description, quantity, estimated cost, and required date
- Attach supporting documents (e.g. specifications, quotes)
- Submit the PR for review

**Output:** Submitted Purchase Requisition (PR)

## Step 02 | Approval Workflow

Line Manager / Budget Holder / Finance

- Receive notification of pending PR
- Review the request for business justification and budget availability
- Approve, reject, or request amendments
- If rejected: PR is returned to requester with comments
- If approved: PR progresses to sourcing stage

*Note: Rejection loops PR back to Step 01 for revision.*

**Output:** Approved (or Rejected) Purchase Requisition

## Step 03 | RFQ / Vendor Selection

Procurement Officer

- Issue a Request for Quotation (RFQ) to shortlisted suppliers
- Collect and compare vendor bids (price, lead time, quality, terms)
- Conduct due diligence or vendor evaluation if required
- Select the preferred vendor based on evaluation criteria
- Negotiate terms and conditions as needed

**Output:** Selected Vendor with agreed terms

## Step 04 | Purchase Order (PO)

Procurement Officer / System

- Create a formal Purchase Order in the procurement module
- Confirm item details, quantities, unit price, and delivery date
- Route PO for any required internal sign-off
- Send the approved PO to the supplier

- Log the PO reference number for tracking

**Output:** Issued Purchase Order (PO) sent to supplier

## Step 05 | Goods / Services Receipt

Warehouse / Receiving Team / End User

- Receive delivered goods or confirm service completion
- Inspect delivery against PO specifications and quantities
- Record a Goods Receipt Note (GRN) in the system
- Flag any discrepancies, shortages, or damaged items
- Store items and notify relevant stakeholders

**Output:** Goods Receipt Note (GRN) logged in the system

## Step 06 | Invoice Verification (3-Way Match)

Accounts Payable / Finance

- Receive supplier invoice
- Perform 3-way match: Purchase Order vs GRN vs Invoice
- Verify quantities, prices, and terms match across all documents
- If matched: approve invoice for payment
- If mismatch: raise dispute, notify supplier, return to Step 05

*Note: Mismatches loop back to Step 05 for resolution.*

**Output:** Verified and approved invoice

## Step 07 | Payment Processing

Finance / Accounts Payable

- Schedule payment based on agreed payment terms (e.g. Net 30)
- Obtain final payment approval from finance authority
- Process payment via bank transfer, EFT, or cheque
- Record payment in the accounting system
- Send remittance advice to the supplier

**Output:** Payment made to supplier

## Step 08 | Record Keeping & Reporting

Procurement / Finance / Audit

- Archive all transaction documents (PR, PO, GRN, Invoice, Payment)
- Update supplier performance records
- Generate spend analytics and procurement reports
- Maintain audit trail for compliance and governance

■ Use data to inform future procurement decisions

**Output:** Complete audit trail and updated procurement records

---

*This document outlines the standard procurement process flow. Steps may vary depending on organisational policy, system configuration, and transaction value thresholds.*
